

**ANDREW STEC DEDICATES POLISH STAMP  
TO POLISH-AMERICAN COMRADE-IN-MARS**

SEATTLE, WA (MARS) June 13, 2010 – Today, Andrew D. Basiago, the Polish-American president of the Mars Anomaly Research Society (MARS), found a Polish postage stamp (*below*) on his Wall on the social networking website on the World Wide Web known as “Facebook.”

It had been sent to him by another of today’s leading Mars anomaly researchers, Andrew R. Stec, the Polish-born producer of [www.marsrevealed.com](http://www.marsrevealed.com).

The caption to the postage stamp, published in Poland to honor the feats of America’s Apollo 15, which included the introduction of the lunar rover, read simply:

In this photo: [Andrew D. Basiago](#), [Andrew R Stec](#).

This is what it means to be a comrade-in-Mars!
