

**FACE DISCOVERED ON
SATURN'S ENCELADUS**

SEATTLE, WA (MARS) February 17, 2010 – The Cassini space probe's fly-by of Saturn's tiny moon Enceladus on November 21, 2009 revealed this phenomenal image of a humanoid face that is sure to forever be known as The Face on Enceladus.

Acknowledgments

MARS wishes to thank Richard Craig Bennie for bringing this amazing discovery to our attention.
